

Constitutional acupuncture

The basis for the harmonization of the organism is the constitutional energy of a person based on year, month, day and hour of birth calculation. The combination of the energy of the Heavenly Stems and Earthly Branches in the four pillars along with the prevailing energy of the Division of the year of birth creates an energetic constitutional map of a person. All internal organs and meridians are linked to the energy of the Heavenly Stems and Earth Branches. With the help of a constitutional map, we can deduce person's tendencies to energy imbalances in organs and meridians. The map helps as to understand the root of imbalances, problems and pathologies, based on them we can effectively choose the selection of acupuncture points and meridians for harmonising person's constitutional energy. Important part is the determination of constitutionally unsuitable meridians and acupuncture points that might not be suitable for someone, often due to the weakening of his personal energy.
